Overview

- I am a Fullstack Developer focused on practical web products using React, Node.js, and PHP. I have experience building applications from front-end to back-end, including real-time classroom management, to-do apps, e-commerce, and personal portfolios; optimizing user experience, authentication, authorization, payment integration, and multi-channel notifications. My priority is writing clear, easily extensible code and implementing features that operate stably in real-world scenarios.
