Overview

Junior Full-stack Developer with hands-on experience building responsive web applications using React.js, TypeScript, JavaScript, PHP, and MySQL. Experienced in developing RESTful APIs, JWT authentication, role-based authorization, e-commerce workflows, payment integration, and administrative management systems. Focused on writing maintainable code, designing reliable application architecture, and delivering consistent user experiences across desktop and mobile devices

Work experience

Sep 2024 – Apr 2025

Quoc Bao Software Company Limited

Fond-End Developer

- Contributed to developing and maintaining responsive web interfaces for desktop and mobile devices.
- Implemented user interface components based on project designs and functional requirements.
- Supported website performance optimization and basic on-page SEO.
- Identified and resolved responsive layout and user interface issues.
- Collaborated with team members during the development and testing process.
- Collaborated with team members and managed source code using Git.
- Converted Figma designs into responsive web interfaces.
- Integrated RESTful APIs and handled loading, validation, and error states on the user interface.

Education

09/2021 – Present

University of Foreign Languages and Information Technology

Information Technology – Web and Mobile Application Development

Skills

- Main**
- Frontend: Frontend: React.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Radix UI, Vite, React Router, Responsive Design
 - Backend: Node.js, Express.js, PHP, RESTful API, JWT Authentication, Role-based Authorization
 - Database & Services: MySQL, PDO, Database Design, Foreign Keys, Transactions, Postman.
 - Testing: Vitest, Playwright, PHP Testing
 - Tools: GitHub
 - Basic English
 - Additional Knowledge: MVC Architecture, Controller-Service-Repository Architecture, Basic SEO, Internationalization

Projects

Personal Portfolio

(12/2024 - Present)

Client	DUCPHU COMMERCE
Description	https://ducphupersonal.io.vn/
Number of members	1
Position	Full-stack Developer
Responsibilities	• Built a full-stack e-commerce platform with storefront, authentication, cart, checkout, order history, and a role-protected Admin CMS. • Designed 66 REST API routes and a 19-table MySQL schema using Controller-Service-Repository architecture, PDO prepared statements, validation, transactions, and row locking. • Integrated PayOS payment links, HMAC-signed webhooks, idempotency, and reconciliation to keep payment and order states consistent. • Added secure media uploads, JWT authorization, rate limiting, audit logs, and CI quality gates with Vitest, Playwright, PHP tests, and MySQL integration tests.
Technology in use	• Tech Stack: React.js, TypeScript, Tailwind CSS, PHP, MySQL, PDO, JWT, PayOS, Vitest, Playwright, GitHub Actions
